<b>PART I A Framework for Financial Decisions</b>	<b>1</b>
<b>1. An overview of financial management</b>	<b>3</b>
1.1 Introduction	3
1.2 The finance function	6
1.3 Cash – the lifeblood of the business	7
1.4 The emergence of financial management	9
1.5 The finance department in the firm	11
1.6 The financial objective	12
1.7 The agency problem	13
1.8 The corporate governance debate	16
1.9 The risk dimension	17
1.10 The strategic dimension	18
1.11 Making strategic finance decisions	21
1.12 Financial theory and practice	23
1.13 Summary	24
<b>2. The financial environment</b>	<b>27</b>
2.1 Introduction	27
2.2 Financial markets	28
2.3 The financial services sector	30
2.4 The securities or capital market	33
2.5 The Efficient Market Hypothesis	35
2.6 A new perspective – Chaos Theory	39
2.7 Short-termism in the City	40
2.8 Reading the financial pages	41
2.9 Taxation and financial decisions	45
2.10 Summary	46
Appendix: UK taxation	47
<b>3. Present values and wealth</b>	<b>53</b>
3.1 Introduction	53
3.2 Measuring wealth-creation	54
3.3 Time-value of money	55
3.4 Compounding and discounting	57
3.5 Present value formulae	60
3.6 Net present value	63
3.7 Summary	66
Appendix I: The investment–consumption decision	67
Appendix II: Present value formulae	73
<b>4. Valuation of assets, shares and companies</b>	<b>78</b>
4.1 Introduction	78
4.2 The valuation problem	79
4.3 Valuing a company using published accounts	80
4.4 Company value: the theory and a simple case	84
4.5 Valuing shares	86
4.6 Problems with the dividend growth model	89
4.7 Valuing the earnings stream	91
4.8 Using a DCF approach	93
4.9 Shareholder value analysis	94
4.10 The valuation of unquoted companies	96
4.11 Summary	97
<b>PART II Investment Decisions and Strategies</b>	<b>105</b>
<b>5. Investment appraisal methods</b>	<b>107</b>
5.1 Introduction	107
5.2 Investment techniques	108
5.3 Internal rate of return (IRR)	110
5.4 Non-discounting approaches	114
5.5 Ranking mutually exclusive projects	116
5.6 Modified IRR	120
5.7 Investment evaluation and capital rationing	121
5.8 Summary	125
Appendix: Multi-period capital rationing and mathematical programming	126
<b>6. Project appraisal – applications</b>	<b>134</b>
6.1 Introduction	135
<i>Contents</i>	vii
6.2 Capital investment analysis	136
6.3 Incremental cash flow analysis	137
6.4 Replacement decisions	140
6.5 The problem of unequal lives: Allis plc	143
6.6 Inflation	144
6.7 Taxation	146
6.8 Strategic investment options	149
6.9 Summary	151
<b>7. Investment evaluation in practice</b>	<b>157</b>
7.1 Introduction	157
7.2 Use of DCF techniques	158
7.3 Traditional appraisal methods	159
7.4 Why managers prefer IRR to NPV	164
7.5 Dangers with DCF: the illusion of accuracy	165
7.6 Japanese practices	167
7.7 Advanced manufacturing technology (AMT) investment	168
7.8 Summary	170
<b>8. Analyzing investment risk</b>	<b>174</b>
8.1 Introduction	174
8.2 Expected net present value	176
8.3 Attitudes to risk	177
8.4 Types of project risk	178
8.5 Measurement of risk	179
8.6 Risk description techniques	184
8.7 Adjusting for risk	190
8.8 Risk analysis in practice	192
8.9 Summary	193
Appendix: Multi-period cash flows and risk	194
<b>9. Relationships between investments: portfolio theory</b>	<b>202</b>
9.1 Introduction	202
9.2 Portfolio analysis: the basic principles	204
9.3 How to measure portfolio risk	206
9.4 Portfolio risk–return analysis	209
9.5 A worked example: Gerrybild plc	211
9.6 Some reservations	213
9.7 Summary	215
<b>10. Setting the risk premium: the capital asset pricing model</b>	<b>220</b>
10.1 Introduction	220
10.2 Concepts of return and risk	222
10.3 Systematic risk and the valuation of individual securities	226
<i>Contents</i>	viii
10.4 Completing the model	230
10.5 Using the CAPM: assessing the required return	232
10.6 Developing the CAPM: the underlying assumptions	234
10.7 Portfolios with many components: the capital market line	235
10.8 How it all fits together: the key relationships	239
10.9 Reservations in using the CAPM	240
10.10 Issues raised by the CAPM: some food for managerial thought	242
10.11 Summary	242
Appendix I: Analysis of variance	244
Appendix II: Arbitrage pricing theory	244
<b>11. The capital investment process</b>	<b>251</b>
11.1 Introduction	251
11.2 Determination of the budget	254
11.3 Search for and development of projects	254
11.4 Evaluation and authorization	257
11.5 Monitoring and control	259
11.6 Post-auditing	260
11.7 Strategic considerations	264
11.8 Summary	267
Appendix: Checklist of the main considerations for assessing capital projects	268
<b>PART III Financing Decisions and Policy</b>	<b>271</b>
<b>12. Sources of finance</b>	<b>273</b>
12.1 Introduction	273
12.2 Types of corporate finance	275
12.3 Equity finance	276
12.4 Debt finance	281
12.5 Other sources of finance	286
12.6 Short-term finance	288
12.7 Summary	290
<b>13. The dividend decision</b>	<b>295</b>
13.1 Introduction	295
13.2 The strategic dimension	298
13.3 The legal dimension	298
13.4 The theory of dividend policy	299
13.5 Objections to dividend irrelevance	305
13.6 The case for a stable dividend policy	313
13.7 Conclusion	314
13.8 Summary	315
Appendix: Home-made dividends	316
<i>Contents</i>	ix
<b>14. Gearing and the required return</b>	<b>323</b>
14.1 Introduction	323
14.2 Measures of gearing	326
14.3 The ‘magic’ of gearing	329
14.4 The ‘traditional’ view	332
14.5 The cost of debt capital	335
14.6 The overall cost of capital	337
14.7 Financial distress	339
14.8 Predicting corporate failure	341
14.9 Two more issues: signalling and agency costs	342
14.10 Conclusions	343
14.11 Summary	344
<b>15. Capital structure: the underlying relationships</b>	<b>350</b>
15.1 Introduction	351
15.2 The Modigliani–Miller message	352
15.3 MM’s propositions	354
15.4 Impediments to arbitrage	358
15.5 MM with corporate income tax	358
15.6 MM with financial distress	361
15.7 Capital structure theory and the CAPM	363
15.8 Allowing for personal taxation: Miller’s revision	364
15.9 Summary and conclusions	366
Appendix I: Derivation of MM’s proposition II	367
Appendix II: Key MM expressions under the imputation tax system	368
<b>16. Leasing decisions</b>	<b>372</b>
16.1 Introduction	372
16.2 How a lease works	374
16.3 Profile of leasing activity	376
16.4 Leasing as a finance: a simple case	376
16.5 Leasing as an investment: the three-stage approach	380
16.6 Motives for leasing	381
16.7 Allowing for Corporation Tax in lease evaluation	383
16.8 Loose ends	385
16.9 Policy implications: when should firms lease?	387
16.10 Summary	389
<b>17. Working capital management and policy</b>	<b>394</b>
17.1 Introduction	394
17.2 Cash operating cycle	396
17.3 Working capital policy	398
17.4 Financing working capital	402
17.5 Overtrading problems	403
<i>Contents</i>	x
17.6 Inventory management	405
17.7 Managing trade credit	406
17.8 Cash management	409
17.9 Summary	413
<b>PART IV Integrated Topics: Overview</b>	<b>419</b>
<b>18. The required rate of return on investment</b>	<b>421</b>
18.1 Introduction	422
18.2 The required return in ungeared companies: using the DGM	423
18.3 The required return in ungeared companies: using the CAPM	426
18.4 The required return in a geared company	427
18.5 The adjusted present value method	430
18.6 Using ‘tailored’ discount rates	433
18.7 Problems with ‘tailored’ discount rates	440
18.8 A critique of ‘divisional hurdle rates	441
18.9 Summary	443
<b>19. Managing currency risk</b>	<b>450</b>
19.1 Introduction	450
19.2 The structure of exchange rates: spot and forward rates	452
19.3 Foreign exchange exposure	453
19.4 Economic theory and exposure management	455
19.5 Designing a foreign exchange management (FEM) strategy	460
19.6 Internal hedging techniques	465
19.7 External hedging techniques	466
19.8 Conclusions	467
19.9 Summary	468
<b>20. The foreign investment decision</b>	<b>472</b>
20.1 Introduction: what is foreign investment?	473
20.2 The multinational corporation	473
20.3 Factors favouring Foreign Direct Investment	474
20.4 Evaluating the foreign investment decision	477
20.5 Required rates of return	483
20.6 Investment and financing interactions: using the adjusted present value approach	484
20.7 Hedging the risk of foreign projects	485
20.8 Political risk	487
20.9 Summary	489
<b>21. Identifying and valuing options</b>	<b>497</b>
21.1 Introduction	498
21.2 Share options	498
<i>Contents</i>	xi
21.3 Option pricing	501
21.4 Application of option theory to finance	506
21.5 Summary	511
<b>22. Acquisitions and restructuring</b>	<b>514</b>
22.1 Introduction	514
22.2 The 1980s takeover boom	516
22.3 Motives for takeover	518
22.4 Financing a bid	522
22.5 The importance of strategy	523
22.6 The strategic approach	524
22.7 Post-merger integration	530
22.8 Assessing the impact of mergers	534
22.9 Value gaps	538
22.10 Corporate restructuring	539
22.11 Summary	543
22.12 Case study: BAT Industries plc	544
<b>References</b>	<b>562</b>
<b>Appendix A: Suggested solutions to selected end-of-chapter questions</b>	<b>568</b>
<b>Appendix B: Present value of £1 due at end of <math>n</math> years</b>	<b>593</b>
<b>Appendix C: Present value of annuity of £1 for <math>n</math> years</b>	<b>597</b>
<b>Appendix D: Call option values as per cent of share price</b>	<b>601</b>
<b>Index</b>	<b>603</b>
