

CONTENTS

Authors	vii
Introduction	xiii
Bruno Dupire of Nikko Financial Products	

GENERALITIES

1	Options: A Monte Carlo Approach	5
	Phelim P. Boyle of University of Waterloo	
2	Monte Carlo Methods for Security Pricing	15
	Phelim P. Boyle of University of Waterloo, Mark Broadie and Paul Glasserman of Columbia University	
3	Monte Carlo Toolkit	45
	Bruno Dupire of Nikko Financial Products	

PRICING

4	Dimension Reduction and Other Ways of Speeding Monte Carlo Simulation	51
	Bruno Dupire of Nikko Financial Products and Antoine Savine of General Re Financial Products	
5	Average Intelligence	65
	Edmond Levy of HSBC MIDLAND and Stuart Turnbull of Queens University, Canada	
6	Beyond Average Intelligence	73
	Michael Curran of RiskCare Ltd	
7	Strata Gems	75
	Michael Curran of RiskCare Ltd	
8	Recovering Identity	77
	Michael Curran of RiskCare Ltd	
9	Greeks in Monte Carlo	79
	Michael Curran of RiskCare Ltd	
10	Quicker on the Curves	81
	Les Clewlow of University of Warwick and Andrew Carverhill of University of Science and Technology, Hong Kong	
11	Exact Exotics	85
	Leif Andersen and Rupert Brotherton-Ratcliffe of General Re Financial Products	
12	Monte Carlo Simulation of Options on Joint Minima and Maxima	91
	Leif Andersen of General Re Financial Products	
13	Model Calibration in the Monte Carlo Framework	103
	Raphaël Douady of Ecole Normale Supérieure, CMLA	

AMERICAN-STYLE

- 14 **Valuing American Options in a Path-Simulation Model** 123
James A. Tilley of Morgan Stanley
- 15 **Numerical Valuation of High-Dimensional Multivariate American Securities** 133
Jérôme Barraquand of Salomon Brothers International and Didier Martineau of Long-Term Capital Management
- 16 **Monte Carlo Methods for Pricing High-Dimensional American Options: An Overview** 149
Mark Broadie and Paul Glasserman of Columbia University

FIXED INCOME

- 17 **Pricing Interest Rate Exotics by Monte Carlo Simulation** 167
Les Clewlow of Lacima Consultants Ltd, Warwick Business School and Chris Strickland of University of Technology, Sydney, Australia
- 18 **Efficient and Flexible Bond Option Valuation in the Heath, Jarrow and Morton Framework** 183
Andrew Carverhill of Hong Kong University of Science and Technology and Kin Pang of Morgan Stanley Dean Witter & Co
- 19 **Term Structure Dynamics and Mortgage Valuation** 191
Oren Cheyette of BARRA Inc

VAR

- 20 **Calculating Value-at-Risk with Monte Carlo Simulation** 209
Evan Picoult of Citibank
- 21 **Beyond VAR and Stress Testing** 231
Julian Shaw of NatWest Markets
- 22 **Using Non-Normal Monte Carlo Simulation to Compute Value-at-Risk** 245
Gerald D. Quinlan of TrueRisk Inc
- 23 **Scrambled Nets for Value-at-Risk Calculations** 255
Art Owen of Stanford University and Domingo Tavella of Align Risk Analysis

DETERMINISTIC METHODS

- 24 **Quasi-Monte Carlo Methods in Numerical Finance** 269
Corwin Joy of Positron Energy Consulting, Phelim P. Boyle and Ken Seng Tan of University of Waterloo
- 25 **New Methodologies for Valuing Derivatives** 281
Spassimir H. Paskov of Barclays Capital
- 26 **Valuation of Mortgage-Backed Securities Using Brownian Bridges to Reduce Effective Dimension** 301
Russel E. Caflisch of UCLA, William Morokoff of Goldman Sachs and Art Owen of Stanford University
- 27 **Smoothness and Dimension Reduction in Quasi-Monte Carlo Methods** 315
Bradley Moskowitz of Bettis Laboratory and Russel E. Caflisch of UCLA
- 28 **Beating Monte Carlo** 327
Anargyros Papageorgiou and Joseph Traub of Columbia University
- 29 **Monte Carlo Motoring** 331
Rupert Brotherton-Ratcliffe of General Re Financial Products
- 30 **Laudable Lattices** 335
Craig Stetson of Arizona Public Service, Steve Marshall and David Loebell of Chase Manhattan
- 31 **Inelegant Efficiency** 339
John Barrett and Gerald Moore of Imperial College and Paul Wilmott of Imperial College and University of Oxford
- Glossary of Monte Carlo terms** 343
