Introduction		
Mario Quagliariello (Bank of Italy)		1
Part I	Fundamentals	5
<hr/>		
1	A framework for assessing financial stability	
	Maurizio Trapanese (Bank of Italy)	7
	1.1 Introduction	7
	1.2 Building the framework	9
	1.3 The use of macroprudential analysis for assessing financial stability	11
	1.4 Looking for instability	12
	1.5 Conclusions	16
	References	17
2	Macroeconomic stress-testing: definitions and main components	
	Mario Quagliariello (Bank of Italy)	18
	2.1 Introduction	18
	2.2 Objectives of stress-testing: the micro and macro perspectives	19
	2.3 Stress tests: definitions	22
	2.4 The ingredients for macroeconomic stress-testing	25
	References	35

3	Macroeconomic stress-testing banks: a survey of methodologies Mathias Drehmann (Bank for International Settlements)	37
	3.1 Introduction	37
	3.2 Exposures to risk	38
	3.3 The risk measure	48
	3.4 The model of the data generating process	50
	3.5 Methodological challenges	55
	3.6 The new frontier: an integrated approach to macroeconomic stress-testing	60
	References	62
4	Scenario design and calibration Takashi Isogai (Bank of Japan)	68
	4.1 Introduction	68
	4.2 Objectivity and plausibility of stress tests	69
	4.3 Technical discussion on the plausibility of stress scenarios	74
	4.4 Conclusions	77
	References	78
5	Risk aggregation and economic capital Vincenzo Tola (Bank of Italy)	80
	5.1 Introduction	80
	5.2 Some basic definitions	81
	5.3 Related literature	83
	5.4 Copulas	84
	5.5 Copulas in an economic capital model	87
	5.6 Conclusions	96
	References	97
6	Data needs for stress-testing Francesco Cannata (Bank of Italy) and Ulrich Krüger (Deutsche Bundesbank)	99
	6.1 Introduction	99
	6.2 Overview of the information needed for stress-testing	100
	6.3 Data needs by risk type	103
	6.4 A focus on credit risk	106
	6.5 A possible tool for organising data	110
	References	115

7	Use of macro stress tests in policy-making Patrizia Baudino (Financial Stability Board)	117
	7.1 Introduction	117
	7.2 Use of macro stress tests for policy-making: limitations and benefits	120
	7.3 How macro stress tests have been used for policy-making References	124 128
Part II Applications		131
8	Stress-testing credit risk: the Italian experience Sebastiano Laviola, Juri Marcucci and Mario Quagliariello (Bank of Italy)	133
	8.1 Introduction	133
	8.2 The Italian banking system: some stylised facts	134
	8.3 An analytical framework for stress-testing credit risk	135
	8.4 Stress test results	143
	8.5 Conclusions References	147 148
9	Stress-testing US banks using economic-value-of-equity (EVE) models Mike Carhill (Office of the Comptroller of the Currency)	149
	9.1 Introduction	149
	9.2 The EVE concept	151
	9.3 Future business	153
	9.4 Model uncertainty	155
	9.5 Credit risk	160
	9.6 Conclusions	162
	Appendix Variation of deposit sensitivity estimates across banks References	162 163
10	A framework for integrating different risks: the interaction between credit and interest rate risk Steffen Sorensen (Barrie and Hibbert) and Marco Stringa (Bank of England)	165
	10.1 Introduction	165
	10.2 A framework for integrating interest rate and credit risk	168

	10.3	Building blocks of the stress test	172
	10.4	Illustrative simulations	175
	10.5	Future challenges to capture integration in macro stress tests	181
	10.6	Conclusions	182
		References	182
11		Stress-testing linkages between banks in the Netherlands	
		Iman van Lelyveld, Franka Liedorp and Marc Pröpper (De Nederlandsche Bank)	184
	11.1	Introduction	184
	11.2	The Dutch financial landscape	185
	11.3	Interbank loan market	187
	11.4	Payment networks	193
	11.5	Conclusions	199
		References	201
12		An integrated approach to stress-testing: the Austrian Systemic Risk Monitor (SRM)	
		Michael Boss, Gerald Krenn, Claus Pühr and Martin Summer (Oesterreichische Nationalbank)	202
	12.1	Introduction	202
	12.2	The Austrian banking system	204
	12.3	Theoretical foundations of the SRM	206
	12.4	Input data of the SRM	214
	12.5	Application of the SRM	217
	12.6	Output data of the SRM	221
	12.7	Some examples of stress tests with the SRM	224
	12.8	Conclusions	235
		References	237
13		From macro to micro: the French experience on credit risk stress-testing	
		Muriel Tiesset and Clément Martin (Banque de France – French Banking Commission)	238
	13.1	Main features and objectives of the French stress-testing framework	238
	13.2	Stress-testing the French banking sector through macroeconomic scenarios	241
	13.3	Stress-testing corporate credit portfolios through <i>ad hoc</i> credit shocks: analysing banks' concentration risk on business sectors	251

	13.4	Micro surveillance of French banks' credit portfolio risk profile and potential micro/macro links	252
	13.5	Conclusions	255
	Appendix 1	The credit risk migration model	256
	Appendix 2	The model of bank profitability	259
		References	260
14		Stress-testing in the EU new member states	
		Adam Glogowski (National Bank of Poland)	261
	14.1	Introduction	261
	14.2	Credit risk stress-testing	263
	14.3	Market risk stress-testing	269
	14.4	Liquidity risk stress-testing	271
	14.5	Interbank contagion in stress tests	273
	14.6	Challenges for the future	274
		References	276
15		Cross-border macro stress-testing: progress and future challenges for the EU	
		Olli Castrén, John Fell and Nico Valckx (European Central Bank)	278
	15.1	Introduction	278
	15.2	Accounting for the cross-border dimension in credit risk stress-testing	279
	15.3	European challenges to cross-border stress-testing	287
	15.4	Conclusions	294
		References	295
16		Stress-testing at the IMF	
		Marina Moretti, Stéphanie Stolz and Mark Swinburne (International Monetary Fund)	297
	16.1	Introduction	297
	16.2	Background: overview of the FSAP	299
	16.3	Stress-testing in FSAPs	300
	16.4	FSAP stress-testing going forward	307
	Annex	Stress-testing in European FSAPs	310
		References	316
		Conclusions	
		Mario Quagliariello (Bank of Italy)	318

Figures

2.1	Overview of macroeconomic stress-testing	<i>page</i> 21
2.2	Approaches to macroeconomic stress tests	23
2.3	Main components of stress-testing procedures	26
2.4	From risk factors to key macroeconomic variables	32
2.5	Impact of different shocks on solvency ratios	34
3.1	Schematic structure of current macro stress-testing models	38
3.2	A graphical representation of Merton's model	42
3.3	Challenges for stress-testing models	55
5.1	Simulations of bi-variate random vectors from different distributions	92
5.2	Comparison from different loss density probability functions and ratio of percentiles (from 80th to 100th) between t_3 and meta t_3 copulas	93
5.3	Comparison across diversified and undiversified loss density distributions and across economic capital values	95
8.1	Stress-testing credit risk	136
9.1	An application of EVE models	163
10.1	Evolution of the default-free term structure over the next twelve quarters in the base and stress scenario respectively	176
10.2	Steps of the stress test	176
10.3	Shareholder funds as a proportion of risk-weighted assets	177
10.4	Impact on write-offs	178
10.5	Impact on net-interest income	178
10.6	Impact on net profits	179
10.7	Capital adequacy with debt, constant spreads and cyclical loss given default (LGD)	181
11.1	The interbank lending matrix	190
11.2	Cumulative effects of simulated failures	192
11.3	Selected network measures	197
11.4	Impact of node removal on network properties	198

11.5	Development of a selection of traditional system measures and network properties over time	200
12.1	Basic structure of the SRM	207
12.2	Density functions of loss distributions for the aggregated Austrian banking system according to the baseline simulation over the first quarter 2008	226
12.3	Bank defaults due to foreign currency loan losses based on end-2007 data	230
13.1	A snapshot of the French macro stress-testing framework	242
13.2	Net banking income structure	245
13.3	Cumulative impact of the stress scenarios on the dynamics of banks' profitability and RWA	251
14.1	An example of a credit risk stress test combining aggregate and microlevel models. The approach of the National Bank of Poland	269
15.1	Gross cross-border banking flows across selected EU countries and the US	285
15.2	Banking system regulatory capital ratios after a failure of a national banking system in the cross-border banking flows network	286
